NorthStar NavData Services to be Discontinued After Cycle 0903 for the Following GPS Systems.

March 5, 2008

- **M3 Approach** (2 MB Card)
- **M2 , M2V, Heli M-2V, GPS 60, GPS 600, M3, Navigators** (1 MB Card)

We regret to inform you Jeppesen will discontinue offering NavData services for the NorthStar GPS systems listed above as of Cycle 0903 (Effective Date: March 12, 2009).

This has been a difficult decision to make and has been necessitated by the fact that Jeppesen and CMC Electronics have exhausted all alternatives to produce these databases so that they can fit on the required Flash cards for these GPS systems.

These units are engineered to only accept 1MB or 2MB cards (depending on model) and the Jeppesen databases have exceeded these limits due to normal growth of aviation data. Furthermore, Flash cards have become nearly obsolete and Jeppesen no longer has the parts necessary to build Skybound adapters for Flash cards.

We understand it's not easy to quickly replace GPS systems in your aircraft; therefore we are providing a year advance notice prior to discontinuation so that you may plan for product replacement.

Please note, in order to continue to provide these services the geographic coverage areas are continuously re-evaluated to ensure that they can fit within the GPS units' memory capacity. Whenever the GPS memory capacity is surpassed, the geographic coverage areas are reduced and airports outside and close to those new boundaries are removed.

Jeppesen • 55 Inverness Drive East • Englewood • CO 80112-5498 • USA
Tel: (303)799-9090 • (800)621-5377 • Fax: (303)328-4113

Jeppesen GmbH • Frankfurter Str. 233 • 63263 Neu-Isenburg • Germany
Tel: 49 6102 50 70 • Fax: 49 6102 50 79 99

If your revision service extends beyond Cycle 0903, we will refund you the difference from April 8, 2009 to your established end of service date.

Sincerely,

Jeppesen
